

Category: Sustainability

The Sustainability Award recognises projects, buildings, systems, methodologies and new products that are both future proof and working to ensure the quality of that future. Innovative practices, choice of materials, design considerations and improvements to ecology, nature and the wider environment will all be considered. The winning project will demonstrate how it minimises its energy usage, its carbon emissions and its impact on the wider environment.

The headings below reflect the judging criteria, and you will need to provide the relevant information and evidence under each heading.

ENTRANT DETAILS Full name Job title Organisation name (as you wish the organisation to be referred to throughout) **Email** Phone Project Name (as you wish for this to be referred to throughout) **Project Completion Date Project Address**
